About VIT University

Vellore Institute of Technology, Vellore, is a prominent engineering institution, acclaimed for its eminence in delivering world class education along with co-curricular activities that nurture students and help them become technologically superior and ethically stronger.

Standing at the erstwhile Vellore Engineering College, Vellore Institute of Technology was the result of the perseverance of our chancellor, Dr. G. Vishwanathan whose objective is to provide an environment that could foster intellectual aptitude, enhance human perception, and to create a society of superlative students who would continuously strive to improve the quality of lives not just for themselves but also to help the nation as a whole.

About ACM VIT

Right from our conception in 2009, ACM VIT has been organising and conducting successful technical events, quizzes, seminars and a lot more. We are not just an organisation, we're a family. We're a team consisting of professionals in graphic designing, app development, web development and machine learning. Technology is our cause and education, our objective. We are the [Association for Computing Machinery](#).

ACM VIT has been dedicatedly working on technical projects. From web development to app development, machine learning to data structures, ACM has been trying to conquer every technical field possible. The websites "All About VIT" and "VIT Cabshare" are some of the treasured creations of members of ACM VIT.

For ACM VIT, [technology is all that matters](#).

ODE 2 CREATE

A thrilling tech sprint looked forward to by all techies, this hackathon is one of its kind. ACM VIT has been conducting a series of successful events and now we offer up with one of our most exciting events. This April, there is going to be an explosion of technicality, and the participants are going to get high on algorithms. This hackathon is all about designing, building and creating. All the tech geeks out there in the crowd - the graphic designers, the software developers, the app developers and the web developers - all the entrepreneurs, all the budding technical enthusiasts; they will all come together to collaborate intensively on software projects. It is an outburst of technology. It is a tech-marathon. It is a hackathon.

VIT University, Vellore

14-16 April 2017

Expected Participants - 300+

Previous Events

#iteratePython - A series of workshops that taught students the basics of python and the uses of some of its libraries

BigDataAnalytics- A workshop conducted during graVitas, focussed on the analysis of TB's of data using hadoop and ML.

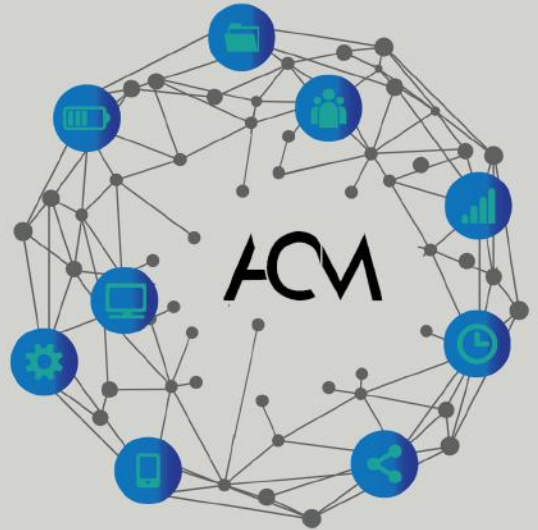

Codart- A unique fun-filled challenge that involved dart, balloons and competitive coding questions

Talk the Future Tech - A technological talk that covered three major topics - Open Source, Augmented and VR, and Computer Vision.

Why Sponsor Us??

ACM VIT is a renowned student chapter, with a core of over 50 students. It houses four teams - management, technical, research and design. We are proud to say that we are VIT's first student chapter to host a research division. Our members are budding technical enthusiasts eager to learn and help others learn. We have conducted interesting and informative workshops, helping students discover their hidden passions in various fields. We strive towards technical excellence, and have built a name for ourselves as a chapter that believes in quality.
